ANDREU WORLD ADELA REX

Philippe Starck's first collaboration with Andreu World, the sculptural Adela Rex arm- and lounge chairs are crafted utilizing a special mould. Rendered in oak and walnut plywood, the pieces have a low carbon footprint and each component can be recycled after use. To personalize the seats, clients can select from a wide range of fabric and leather upholstery.

ARPER KATA

Displaying a marriage of traditional handicraft and 'soft' technology, Kata is the first-ever solid-wood lounge chair offered by Arper. The sustainability-minded Altherr Désile Park-designed seat takes reference from artisanal wood and woven straw chairs, reworking their timeless silhouettes through contemporary, eco-friendly methods. Kata sports an oak and black locust, FSC-certified wooden frame, and tailor-made 3D-knit textile upholstery.

ECOBIRDY RICHARD

Part of the RoGuiltlessPlastic exhibition curated by Rossana Orlandi during Milan Design Week, the Richard armchair by EcoBirdy raises awareness about plastic waste originating from household trash. Design duo Vanessa Yuan and Joris Vanbriel envisaged a set suited for indoor or outdoor and private or public use – Richard is accompanied by Judy, a side table.

VIBIA PLUSMINUS

Dissect the name of Stefan Diez and Vibia's latest collaboration and you'll find synonyms for addition and subtraction, referring to the way the product's various light sources can be easily attached or removed from the customizable system. Plusminus's support structure and electrical conductivity are both hidden in a specially developed fabric strap, to which users can intuitively clip lamps to achieve the desired effect.

MARSET IHANA

Ihana, a lighting collection designed by Finnish architect Joanna Laajisto for Marset, comprises a series of opal-blown glass diffusers. These curvaceous forms contrast with the linear metal structures they stem from – each of the supports can be extended to incorporate up to 14 luminaires, and different sizes are available. Ihana also boasts dim-to-warm technology for adjusting lighting to any scenario.
